

Product Change Notice

PCN #:	PCN-260428
Notice date:	28 th April 2026
Title:	Change to RT-Strut extension leg length

Dear Customer,

This document is to inform you of an upcoming change related to one or more of our products. Product changes may include updates to availability, adjustments in materials or components, or other modifications made as part of our ongoing product lifecycle and quality management processes. We provide this notice to ensure you have clear and timely information to support your planning, qualification, and continued use of our products.

The following notification outlines a change to the extension legs supplied as part of the RT-Strut products.

1. Affected Product(s)

Part number	Name
109-01007	RT-Strut - Standard (81 cm - 150 cm) (W60)
109-01005	RT-Strut - Standard (81 cm - 150 cm) (W120)
109-01262	RT-Strut - Extended (1.8 m - 2.4 m) (W60)
109-01006	RT-Strut - Extended (1.8 m - 2.4 m) (W120)

2. Description of Change

The extension legs supplied with the RT-Strut products are being increased in length from 375 mm to 575 mm. The resulting maximum height of the RT-Strut – Standard will be increased to 1.57 m, and the maximum height of the RT-Strut – Extended will be 2.57 m.

3. Reason for Change

A previous design update to the RT-Strut - Standard model resulted in the maximum achievable height reducing from 1.50 m to 1.40 m. Following customer feedback and the evolving needs in automotive testing with vehicle heights increasing, the extension legs have been increased in length to restore the original 1.5 m capability plus some additional flexibility for a maximum achievable height of 1.57 m.

For consistency, the new extension legs are also being applied to the RT-Strut – Extended models.

4. Impact of Change

This change has no impact on product performance, safety, or compatibility. Validation testing confirms that all load ratings and functional characteristics remain unchanged. The only difference is an increased maximum extension height. There are no changes to installation, operation, packaging, or part numbers.

5. Recommended Replacement Product(s)

Part number	Name
N/A	N/A
