

# Role Description

Role Description	Support Engineer - Regional
Document owner:	Chief Commercial Officer
Version:	200908
Keep informed:	Support Engineers - Regional

## 1. Overview

The Support Engineer - Regional is based in a geographical region (i.e. not in UK) and primarily provides product support and training for local (i.e. in their region) customers, representatives and other channel partners, in the local language.

This includes resolving customer problems, creating support documentation, demonstrating OXTS products, developing application solutions, and identifying opportunities for improved products and services. The role requires in-depth understanding of the functionality and use of the company's products and their applications and requires frequent travel in their region and occasional travel outside their region (e.g. to the UK).

The role reports to the local Commercial Manager and has a matrix relationship with the OxTS global Support team. The role also provides email and telephone support to world-wide customers (i.e. outside their region) dependent on demand and prioritisation.

## 2. Duties and responsibilities

### 2.1. General

- Provide customer support by helping customers and representatives with the application of OXTS products; answer questions and resolve issues. Process and analyse customer data sets to establish cause of anomalies; assist to re-process data to remove or reduce effects of anomalies.
