

# WayFinder Prime Roof Mount

## Turn-key localisation roof mount

The WayFinder Prime Roof Mount is designed for easy installation of WayFinder Prime.

The rigid, suction-cup mounting mechanism is suitable for a wide range of vehicles and platforms for fast deployment.

### Key Features

- + Fast and simple installation
- + Portable and versatile
- + Compatible with a wide range of vehicles
- + Strong and durable design

# Why choose the WayFinder Prime Roof Mount?

## Quick to install

- + The WayFinder Prime Roof Mount has been designed to enable quick and accurate installation on a test vehicle
- + Easily transfer the WayFinder Prime system between vehicles without permanent modifications
- + Perfect for short-term projects, demonstrations and fast PoC deployment

## Improved data quality

- + Raised, rigid mounting platform mitigates signal obstruction and vibration from the vehicle body, supporting more reliable positioning performance

## Protects valuable equipment

- + The WayFinder Prime Roof Mount provides a stable mounting platform to help keep the WayFinder Prime system safely positioned throughout operation
